Focus on Results

Hussein Hassoun *Executive Vice President*

Hussein Hassoun is Executive Vice President, Five Stars International, Ltd. and serves as a Principal Analyst.

Mr. Hassoun served as administrator of the Planning Division, Oregon Department of Energy. He was responsible for 20-year energy supply and demand forecasting and technical analyses, including comprehensive residential end use analyses, and energy program evaluations. Highly regarded for his technical and analytical capabilities, Mr. Hassoun was asked to serve on numerous state and regional technical advisory committees, including the group selected to review the state General Fund forecasts.

At Five Stars, Mr. Hassoun has completed comprehensive analyses, including the *Oregon Energy Outlook*, an assessment of the volatile energy markets in 2000 and the significance of those turbulent market conditions for Oregonians at home and at work. In its assessment, Five Stars described the conditions leading to the marked price increases in electricity, natural gas, and petroleum and offered perspectives on the price and supply outlook for those resources. The *Oregon Energy Outlook* was used to brief the Oregon Legislature. Mr. Hassoun also complete technical analyses in support of other work, such as an analysis of state motor pool fleet replacement schedules. He has also supported administration of public purpose programs, include energy efficiency programs for both the State of Oregon and Pacific Power.

Mr. Hassoun has Bachelors of Science, General Engineering, Masters of Science, Management Science/Operations Research, and Masters of Business Administration degrees from Oregon State University. Mr. Hassoun's technical, program management, operations knowledge and analytical capabilities are assets in performing services.
